

UL Announces Saudi Arabia Market Access Services

Version 1.0

All goods entering Saudi Arabia must have a Certificate of Conformity (CoC) issued by a SASO- authorized certification body such as UL in order to clear Saudi customs. (There are three exceptions—military, medical and food products.) In addition, Energy Efficiency certification is required for household refrigerators/freezers, washing machines, air conditioners, motors, and lamps.

Saudi Arabia Market Access Basics

Every shipment of imported goods must be accompanied by a CoC. Certificates of Conformity are issued to a manufacturer or exporter after they have proven compliance with product testing to the relevant Saudi technical regulations; met national, regional or international standards; and passed pre-shipment verification.

Products must be marked with the country of origin. All imported products must be marked with a non-removable label of origin. Products without proper labeling will be held by Saudi customs, and the importer will be requested to take immediate corrective action and/or create a process to prevent repeat offenses. Non-compliance could result in a fine or in goods being returned to their country of origin.

Energy Efficiency License and Labeling

As a SASO-registered laboratory, UL can provide full services to comply with the SASO Energy Efficiency License and Labeling requirements.

Our global network of accredited labs provides cost-effective and convenient testing. Upon completion of testing, UL will obtain SASO-issued Energy Efficient License and Labels.

UL's Saudi Arabia Market Access Services

At UL, we offer you:

- **Ease of Entry:**
Do you have a UL-Listed product or CB certificate? We can take it from there and provide a streamlined pre-shipment inspection and CoC. If you don't, we'll evaluate your product and still provide you with a streamlined pre-shipment inspection and CoC.
- **Speed and Friendliness:**
From our sales staff to our engineering and lab to our field representatives, we are all here to help you succeed.
- **Confidence and Acceptance:**
We have proven acceptance of products in the market by Saudi Arabian authorities.
- **Bottom-Line Impact:**
UL positions you for success. Strategic compliance paths and consolidated testing get you to markets more quickly, expand you into new markets easily, and reduce your compliance costs.
- **A Trusted Partner:**
UL has a global, dedicated team of life safety professionals, widely referenced UL Safety Standards, world-class facilities, and integrated, comprehensive services.

Have confidence in your choice.
Call UL today.
